Baguley's Carbon Footprint

Baguley's Carbon Footprint is higher than the average for Manchester.

Our individual actions can make a big difference to help reduce it. Read on to find out what's adding to the Carbon Footprint and ways to take action.

2.1 tonnes of CO₂ per person Baguley

In a nutshell...

At home

55% of the homes in Baguley with an **Energy Performance Certificate scored** below a 'C' rating for energy performance. This means they need more energy to keep warm, which could mean releasing more CO₂.

On the move

Most of Baguley has a public transport accessibility score of between 5/8 and 6/8, with some streets scoring 7/8, which means coverage, frequency and reliability is good compared to other areas of the city.

Top actions and tips

Organisations like Energy Saving Trust can help advise you on improving your home's energy performance even further as well as saving you money.

Making more use of your public transport links as well as cycling or walking to get around will lower carbon emissions and benefit your health and wellbeing.

Dig into the detail

At home

Electrical sockets and lights in Baguley are emitting less CO₂ now than 10 years ago. This is due to changes in where we get our electricity from and improvements in the efficiency of our lightbulbs and appliances. By choosing more efficient appliances and using them less regularly, Baguley's carbon footprint can be reduced even further.

Most homes in Baguley have an Energy Performance Certificate (EPC) that gives us an idea of how energy efficient a home is. Homes with an 'A' rating need less energy to keep warm and light, homes with a 'G' rating are hard and expensive to heat. 90% of homes in Baguley with an EPC are average or above average on energy performance ('D' or higher). But, only 45% of homes are a 'C' rating or above and just 10% are low cost and low carbon to heat and power ('A' and 'B' rated). Organisations like the <u>Energy Saving Trust</u> and <u>People Powered Retrofit</u> can help with advice on improving your home's energy efficiency, and the <u>Help for</u> <u>Households</u> website has lots of low and no cost tips for saving energy.

The gas we use to heat our homes is a CO_2 causing fossil fuel. The amount of gas used per person in Baguley has dropped by 7% since 2010. By improving the energy efficiency of homes in Baguley and swapping gas appliances to electric for things like cooking, Baguley can reduce its carbon footprint further.

On the move

Baguley has a public transport accessibility score of between 5/8 and 7/8 this means the coverage, frequency and reliability of bus, Metrolink and rail services is good. Only 14% of people in Baguley travel more than 6 miles for work.

As in most of England, Baguley's car travel carbon emissions didn't change for the 10 years up to the pandemic (-5%). There are opportunities to reduce this footprint however, with good options for low carbon travel and potential for more walking and cycling. Plan your journey with the <u>Bee Network</u>.
